

MINI PROJECT ER DIAGRAM SUBMISSION

Title of the project: Medicrew

Name of the Students(UIDs):

- 1)Malhar Bangdiwala – 2019130005
- 2)Rutvik Choudhari – 2019130010

Problem Statement:

To create a two-way platform for users and doctors using a desktop app created in python and database in MySQL to achieve the following:

- 1)Enabling users to get information about doctors and book appointments with them.
- 2)Allowing doctors to check their schedule and get recognized online.

Additional Features:

- 1) Displaying the address on map.
- 2) Filtering doctors by 'near me' feature.
- 3) Using distancematrixai api to achieve the same.
